BEN COHEN WESTPORT, CT (914) 645-2610 COHEN.BENJACOB@GMAIL.COM

I start and build things.

Serial founder and operator at the intersection of technology and marketing. Fifteen years taking ideas from inception to launch across mobile, media, SaaS, games, crypto and AI. Three exits.

FIFTEEN YEARS, FIVE PLATFORMS

2011
App stores
Ten 5 Studio

2016
Instagram
Scopus Media

2018
Hyper-casual games
Umbrella Games

2022
Crypto
Killabears

Current

3
EXITS
Ten 5 Studio to Vertic · Scopus Media sold · MailTag turned around and sold

40M+
DOWNLOADS
Across 20+ mobile titles at Umbrella Games. Monster Merge alone passed 10M.

15M+
FOLLOWERS
Grown from zero at Scopus, then sold to brands

I can build the prototype and find the customer for it.

Over 15 years I have founded and co-founded companies in mobile, media, SaaS, games, crypto and AI, taken each from first prototype to launch, and exited three of them. I live at the intersection of technology and marketing and I am comfortable on both sides.

What I bring to a new idea is speed and judgment. I can get a first version in front of real people in weeks, read what comes back, and decide whether to push, change course or stop. Then I build the team to scale it.

EXPERIENCE

2021 – now
Nov 2021 – Present

BC Labs · Founder · bclabs.vip
Independent product studio and advisory practice.

- Build and launch my own products: FreeCustomSong.com, MightyMe.kids, Tipstr.io, Prayblock and Roast Report. Each one goes from idea to live product with a small team or solo.
- Advise brands on go-to-market and digital growth: paid media, SEO, email, Shopify DTC, Amazon and retail channels, and practical AI workflows.

2025 – now
Mar 2025 – Present

Martini · Partner
AI-powered workspace for film and commercial production.

- Building a collaborative production platform: AI frame generation and video storyboarding, schedules and shot lists, and live on-set collaboration so crews always work from the latest version.

2022 – now
Mar 2022 – Present

Killaverse Media (Killabears) · Co-Founder & CEO

Character-driven entertainment brand. Started as an on-chain collectible. Now a film, gaming and consumer-products business. Fully bootstrapped, with a distributed team across creative, product, community and partnerships.

- Took a new technology that only crypto insiders cared about and built a brand on it. First launched a 3,333-piece genesis collection in April 2022 to test demand, then scaled with multiple larger releases.
- Used the on-chain community as the launchpad, not the product. Designed the engagement mechanics (staking, loyalty rewards, gamified releases) that kept thousands of people invested between drops.
- Took the IP into the real world: film, gaming, apparel and consumer products. First film project named a finalist at the Lumara Film Festival (2026).

2019 – 2026
Aug 2019 – Apr 2026

Sunnora · Partner / General Manager, Head of eCommerce

Pool products designer, manufacturer and distributor.

- Owned the Amazon business with full P&L responsibility. Led ecommerce growth across DTC and marketplaces.
- Hired and built the ecommerce team and the operations behind it.

EARLIER VENTURES

2019 – 2022 MailTag · Partner

SaaS browser extension for email tracking.

- Acquired the distressed business with a partner. Rebuilt the product and the business, then turned it around to a successful exit within 2.5 years.

2018 – 2022 Umbrella Games · Partner

Mobile game developer and publisher.

- Published 20+ hyper-casual iOS and Android titles on rapid iteration: 40M+ lifetime downloads. Monster Merge alone passed 10M.
- Redirected the studio's focus in 2022 to create Killabears.

2016 – 2018 Scopus Media · Founder & CEO

Instagram media publisher.

- Grew @basicbitch, @eats, @perfection and @vacay from zero to 15M+ millennial and Gen Z followers, then monetized it through brand deals and events.
- Partnerships with Burger King and Universal Pictures. Acquired the 90sFest live events company (2017). Exited through the sale of the portfolio.

2011 – 2014 Ten 5 Studio · Founder

Mobile app studio. Acquired by Vertic in 2013; stayed on as VP of Emerging Platforms.

- Created the Talking Ted app for Seth MacFarlane's Ted. It went viral with millions of downloads.
- Delivered mobile experiences for Universal, Skype, Staples and LG.

2009 – 2011 · NBCUniversal, FTI Consulting, Steiner Sports and Telephony Media.

01

Prototype and plan together.
A rough thing in front of real people tells you more than a deck.

02

Validate as you go.
Small bets before big ones. Each step has to earn the next.

03

Tech and marketing in one head.
Engineers in the morning, brand team in the afternoon. I speak both languages without a translator.

SKILLS

Zero-to-one product builds · Rapid prototyping · AI products and workflows · Go-to-market strategy · Paid media · SEO · email · Ecommerce: DTC, Amazon, retail · Community and engagement design · Team building · Brand and platform partnerships · P&L ownership · Turnarounds and exits

EDUCATION

Indiana University, 2009
